

# Product Ranking by Quantity Sales Report Guide

The Product Ranking by Quantity Sales report lists all product sales for the date range specified and ranks them from the highest quantity sold to the lowest.

## When to create the report

We recommend reviewing this report monthly and quarterly.

## How to create the report

1. From the SalonBiz/SpaBiz menu bar, click on the Report icon.
2. Double click Product Ranking by Quantity Sales. You will find it in the Products category.
3. Enter the beginning date and ending date for the report.
4. Enter 000 as the beginning product number and zzz as the ending product number.

## What it tells you

This report tells you which products sold during the time frame.

- Rank - the ranking of each product by sales quantity
- Product Code - the sku number of each product sold
- Product Name - the name of each product sold
- On Hand - the quantity of products that you currently have in your inventory stock
- Qty Sold - the amount of products that were sold during the specified time frame
- Net Sales - the dollar amount of products that were sold during the specified time frame
- Last Sold - the last date that the product was sold on

## How it's used

This report is used to determine your top selling products. It is typically used to determine which products are your top 25 sellers so that you can stock more inventory of those products.

Unlike the Hot and Cold List report, this report ranks the products by how many were sold instead of the highest amount of sales dollars.

## Product Ranking by Qty Sales from 2/1/2008 to 4/30/2008

*For Products from 0000 to ZZZZ*
